Patent and Trademark Office to Sponsor Design Contest for Patent Grant Document

The Patent and Trademark Office is sponsoring a design competition to select a new design for its patent grants to reflect the revolutionary advances in high technology and the automation of the agency.

The present design has been in use for much of this century. The grant is in the form of a four-page folder with the patent printed separately and inserted inside. Pages 2, 3 and 4 of the folder are blank. A ribbon is inserted through eyelets on the left-hand side towards the fold, then tied and secured with a seal on the front.

A design is needed for a cover 8 by 12 inches, which includes a border in a contemporary style.

—The design should be limited to two colors on a light-colored paper stock.

—It should eliminate the hand-tied ribbon, but could include a ribbon crimped under an embossed, adhesive seal 2 inches in diameter.

—It should include the following words:

THE UNITED STATES OF AMERICA

There has been presented to the

COMMISSIONER OF PATENTS AND TRADEMARKS

An application for a patent for a new and useful invention. The title and description of the invention are contained in the specification and any drawings, a copy of which is annexed to and made a part of this patent. The requirements of law have been complied with, and it has been determined that a patent on the invention shall be granted under the law. Therefore this

UNITED STATES PATENT

Grants to the person or persons having title to the invention, as recorded in the Patent and Trademark Office, and their heirs or assigns, the right to exclude others from making, using or selling the invention throughout the United States of America for the term of seventeen years from the date of this patent, subject to the payment of maintenance fees as provided by law.

I have caused the seal of the Patent and Trademark Office to be Affixed this day of

—The design should also include a place for the signature of the Commissioner and the attesting officer, and for the seal and the patent number.

—The words appearing above in capital letters should appear in display type and should be indicated on the layout. Text lines may be enumerated. Type faces, weight and leading should be specified, and a sample line or lines of body type included. If any hand lettering is to be used in place of type it should be included on the layout.

A comprehensive layout should be submitted on bristol board or illustration board, with a protective flap furnished. The winner should be prepared to complete, and will be compensated for, final layout work. Typesetting of the text for the final layout will be done by the government.

Entries must be postmarked no later than Nov. 21, 1983. They will be judged by an impartial panel selected from representative groups with an interest in design and the patent system. The winner will receive $500 and an invitation to the National Inventors Day ceremony at the Patent and Trademark Office Feb. 12, 1984, when the winning design will be unveiled. If you live outside the Washington area, we will pay your way to the Office for the ceremony (subject to Government travel regulations).

To obtain a brochure with contest rules and an entry blank, contact the Office of Public Affairs, CP3-1D01, Patent and Trademark Office, Washington, D.C. 20231. Telephone (703) 557-3428.

DONALD J. QUIGG,
Deputy Commissioner of Patents and Trademarks.

Sept. 23, 1983.

IMPROVEMENTS TO SERVICES

- *Summary of Improvements During FY 1983* — Substantial progress was made over the past year in improving services rated in the 1982 User Survey as poor or fair. As reported in the last Official Gazette of each month, actions were taken to improve timeliness of services, integrity of files, search room working conditions, and quality of photocopy and microfilm reader/printer services.

  As shown in the table above, significant improvements were made in the timeliness of key services. Trademark, patented, and abandoned file histories from the PTO file repositories are being provided within three hours for 90-95% of the files. Files from the Federal Records Center are being provided within five days for most requests. In addition, 65% of all files requested by official search are found within 30 days. Almost all of those not found are old files controlled by the Federal Records Center.

  Several file integrity checks were made in many areas including the Trademark File Repository and all abandoned and patented files in the patent examining groups. Clear accountability for file integrity was established by assignment of individuals to specific areas of the file repositories. An automated file request system was implemented in April 1983 for patent examiners. This allows the Contact Representative staff to dedicate more of their time to handling requests from the public. Over the next year, we hope to obtain additional computer resources to automate file requests from the public and automatically monitor service response times.

  The Patent Search Room working conditions were improved by providing additional space, improving air temperature control and circulation, and establishing a quiet area. Compliments of our lessor, Charles E. Smith, new carpet, drapes and wall covering were installed. An order for new chairs, approved by the search room users, was placed with the General Services Administration.

  Photocopy and microfilm reader/printer quality was improved. New lenses were installed on existing machines and new machines were placed in service. Twenty-three photocopiers were replaced throughout the public areas, significantly improving copy quality.

  More improvements are planned for the coming year.

• *File Maintenance Contract*—Vanguard Technologies Corporation has recently been awarded a contract for the maintenance of PTO files in the Eads Street and Fern Street Files Repositories, the Public Search Room, the Trademark Search Library and the Scientific Library. Assumption of these duties by Vanguard, effective today, should have little effect on present operations since (1) very few changes in procedures are planned, (2) many of the individuals performing these functions for the PTO were hired by Vanguard and (3) all aspects of the contractor's operations will be closely monitored to ensure compliance with the rigid specifications contained in the contract.

THERESA A. BRELSFORD,
Assistant Commissioner for Administration.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The libraries listed herein, designated as patent depository libraries, receive current issues of U.S. Patents and maintain collections of earlier issued patents. The scope of these collections varies from library to library, ranging from patents of only recent months or years in some libraries to all or most of the patents issued since 1870, or earlier, in other libraries.

These patent collections are open to public use and each of the patent depository libraries, in addition, offers the publications of the patent classification system (e.g. The Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions, etc.) and provides technical staff assistance in their use to aid the public in gaining effective access to information contained in patents. With one exception, as noted in the table following, the collections are organized in patent number sequence.

Depending upon the library, the patents may be available in microfilm, in bound volumes of paper copies, or in some combination of both. Facilities for making paper copies from either microfilm in reader-printers or from the bound volumes in paper-to-paper copies are generally provided for a fee.

Owing to variations in the scope of patent collections among the patent depository libraries and in their hours of service to the public, anyone contemplating use of the patents at a particular library is advised to contact that library, in advance, about its collection and hours, so as to avert possible inconvenience.

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See Rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

TRADEMARK REGISTRATIONS CANCELED

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
